

## CT15B35 Cleantime Automatic Scrubber

15 inch Automatic Scrubber with an onboard charger and AGM batteries

- Adjustable handle height to clean the hard to reach areas
- Extremely compact & manoeuvrable
- Simple, easy-to-operate
- Easy to transport
- Designed for minimum noise levels
- Easy to service with many components being removable without tools
- Squeegee blades can be used on all four sides before they are replaced
- Removable recovery tank to quick access to internal components
- Recovery tank can be emptied with the hose anywhere by removing the recovery tank

**This 24 Volt AGM battery powered automatic scrubber is a must have for any small building or contract cleaner.**

### Productivity

The CT15B35 has great productivity with its large capacity solution and recovery tanks. The brush and solution controls automatically stop 2-3 seconds after the handle operation trigger has been released.

### High Performance

The CT15B35 has a centre flow dispensing system (CFS) and rotationally moulded tanks for a high quality and performance machine. The vacuum motor and exclusive squeegee system leaves a clean and totally dry surface. With all these features and many more, you receive a high performance machine at a low cost.

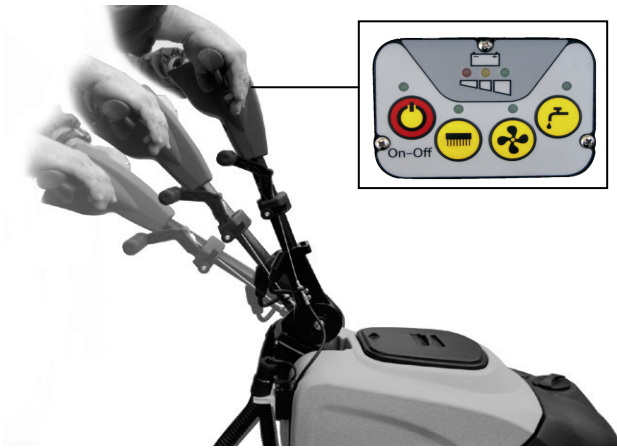

### User Friendly

The CT15B35 has great working visibility while providing outstanding manoeuvrability because of its low profile, optimum weight distribution and adjustable handle while cleaning to reach those hard to clean areas. The displays are easy for people to understand the battery level, brush, vacuum motor and water valve status.

### **Durable Construction**

The CT15B35's tanks and surrounding parts are made from a durable, high density, rotationally moulded polyethylene mounted on a metal frame. The panel control switches are protected against water and humidity. The brush motor has an oil bath friction reduction gear box. The brush head and squeegee system are designed to absorb harsh impacts.

### **Low Maintenance Cost**

The CT15B35 does not require any tools to replace brushes, pad drivers and squeegees. The squeegees can be used on all four sides before replacing. There is easy access to all the internal components by simply lifting the recovery tank up,

<b>Max. Scrubbing Width</b>	15 inches
<b>Squeegee Width</b>	18 inches
<b>Solution Capacity</b>	15 litre / 4 US gal.
<b>Recovery Capacity</b>	19 litre / 5 US gal.
<b>Vacuum Motor</b>	550 Watts
<b>Water lift</b>	inches
<b>Brush Motor</b>	200 Watts
<b>Number of Brushes/Pad Drivers</b>	1
<b>Brush Speed</b>	rpm
<b>Brush Pressure</b>	lbs.
<b>Drive System</b>	Brush-assisted
<b>Cleaning Production Per Hour</b>	up to 14,000 sq. ft.
<b>Voltage</b>	24 Volts
<b>Machine Weight</b>	80 lbs. / 36 kg
<b>Machine Dimensions</b>	16" x 29" x 21"
<b>Estimated run time</b>	up to 75 min.
